THE LIFT PEOPLE...

ABOUT US

Every great company begins with a vision. For Ascensor Pvt Ltd, that vision was clear from the very start—to redefine vertical mobility in the Maldives. Established **in 2017** as a proud subsidiary of Inside Plus Pvt Ltd, Ascensor was created to address a growing challenge: elevators in the country simply did not meet international standards.

To solve this challenge, we partnered with some of the world's most respected elevator manufacturers—Orona Group, BLT, Aritco, and Franz Elevator. Each of these brands is a leader in its field, known for innovation, reliability, and global expertise. By joining hands with them, we were able to introduce a diverse range of world-class elevators to the Maldives, from premium passenger solutions to specialized systems for homes, businesses, and large infrastructure projects.

These partnerships allowed us to bring not only cutting-edge technology but also complete turnkey solutions, ensuring that every stage—from design to installation to after-sales care—meets the highest international standards. More importantly, they gave our clients the confidence that their elevators are backed by proven global quality, with safety and innovation always at the forefront of what we deliver.

In 2024, we reached a major milestone. Through our Innovation Department, Ascensor proudly introduced and began producing its own line of elevators, designed to meet the unique needs of the Maldivian market. This achievement reflects our growth from a distributor to a creator—driven by local insight and global expertise.

Today, Ascensor is recognized as the No. 1 elevator after-sales service provider in the Maldives, and one of the fastest-growing brands in the industry. From private residences to landmark commercial projects, we continue to elevate safety, comfort, and style—helping Maldivians move with confidence, every step of the way.

4 ESSENTIALS FOR A PERFECT LIFT

Space Configurabilty

Configure the dimensions and technology of your elevator to best meet the requirements of your application. The AS-P1000 fits your needs, making your building work by optimizing space with excellent shaft utilization

Green Mobility

Rely on the latest technology. AS-P1000 helps you lower your building's carbon footprint by using energy more efficiently-with regenerative drives for sustainable operation.

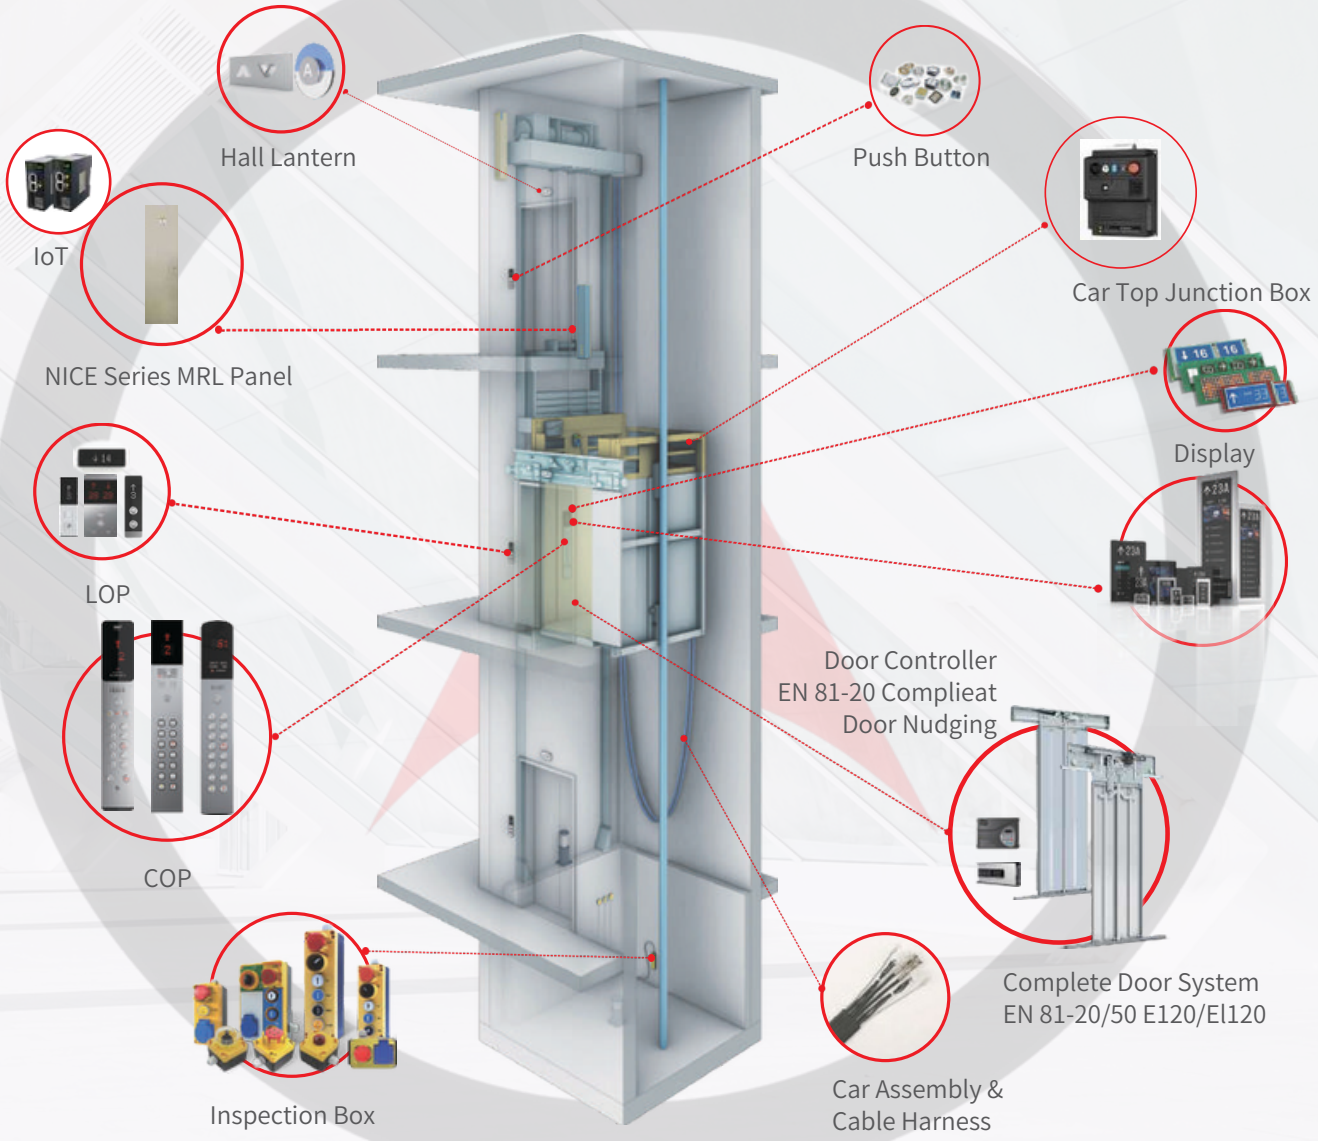

High-Level Performance

Enjoy the faster and smoother ride. The new developments in traction media and control systems give you not only more speed, but also let you handle more passengers and goods providing optimal ride quality.

Freedom of Design

Create the look and the feel of your elevator just the way you always imagined it. Our design lines give you the freedom of choice-from preconfigured cars to your own concept, from functional to sophisticated.

DESIGNS THAT ELEVATES

The design of an elevator cabin is not just about appearances—it shapes the entire passenger experience. A well-crafted cabin combines style, comfort, and functionality, creating a space that feels safe, welcoming, and luxurious. From lighting and materials to mirrors, handrails, and flooring, every detail influences perception, mood, and user confidence.

In modern buildings, elevator cabins are often the first impression visitors get of a property. Thoughtful aesthetics enhance the overall environment, reflect quality and attention to detail, and elevate the status of the building. At Ascensor, we believe that a beautifully designed cabin is as important as smooth, reliable performance, ensuring every ride is not just a journey between floors, but a memorable, comfortable experience.
